

## **Behaviour Statement 2023-2024**

At Turncroft Nursery School we aim to support children in managing their own behaviour and to have respect for each other. We have a few simple rules in school which help us to achieve this.

The rules support us in providing a safe environment for all of our children: helping them to develop to their optimal potential physically, intellectually, emotionally, socially and morally. We review our rules annually with each cohort of children.

All children will be supported to behave in a socially acceptable way and to treat others with respect and good manners. We help our children to take turns, listen carefully, to develop a growing awareness of others and to show empathy.

We aim to adopt a positive and consistent approach to managing children's behaviour, teaching and modelling the skills that will enable our children to learn how to be respectful, responsible citizens.
